

AutoCorrect Command Line Install Switches

Last Modified on Thursday, 25-Jan-2024 10:02:51 GMT

Property (case sensitive)	Value
ACCEPTTEULA	0/1
STARTONEXIT	0/1
Serial	0/ <i>Serial Number</i>
Startup_Shortcut	YES/NO
Desktop_Shortcut	YES/NO
AllowUpdate	YES/NO
AllowSharing	YES/NO
Startmenu_Folder	0/ <i>Folder path</i>
APPDATA_FOLDER	0/ <i>Folder path</i>
CustomInstallDir	0/ <i>Folder path</i>

Using msixec:

To install AutoCorrect using the **msixec** command within Windows, the AutoCorrect.msi must be used.

When running msixec, the ACCEPTTEULA parameter must be supplied with the value 1,

msixec /i "C:\Users\USER\Downloads\AutoCorrect.msi" ACCEPTTEULA="1"

Install with a Product Code:

msixec /i "C:\Users\USER\Downloads\AutoCorrect.msi" ACCEPTTEULA="1" Serial="1234ABCD"

For a silent install, the parameter /qn is used:

msixec /i "C:\Users\USER\Downloads\AutoCorrect.msi" ACCEPTTEULA="1" /qn

To uninstall, the parameter /x is used instead of /i:

msixec /x "C:\Users\USER\Downloads\AutoCorrect.msi" /qn
