

How To Create A USB Version Of Read&Write For Mac

Last Modified on Thursday, 01-Oct-2020 10:13:32 BST

USB minimum specification

The USB must have at least 4GB of free space and have a minimum Read Speed of 15Mb/s.

Steps to create your USB version of Read&Write

1. Go to www.texthelp.com/essentials and log in using your Product Code that you received in your Welcome email upon purchasing Read&Write.
2. Browse to the **Read&Write for Mac** section of the Essentials site.
3. Click on the **Read&Write for Mac Installer** link to download the Read&Write.dmg file.
4. Insert your USB into your Mac.
5. Open the **Read&Write.dmg** file by double-clicking on it.
6. Copy the Read&Write application in the DMG and **paste it into Applications on your Mac**.
7. Now **copy it from Applications onto your USB**. You can now eject the Read&Write.dmg file

Getting started with Read&Write

You can now open Read&Write from your USB and start using it. The first time you use Read&Write, you'll need to **sign in**. Choose from one of 6 providers:

[Google login page](#)

[Facebook login page](#)

[Microsoft login page](#)

[Twitter login page](#)

[LinkedIn login page](#)

Once logged in, enter your **Product Code** to turn on access to the premium features. To do this, click on Read&Write on your Mac toolbar and go to **About Read&Write**. Enter your product code in the box provided and click Activate when finished. You'll now have access to the premium features of Read&Write for the duration of your subscription.
