Increasing Math Font Size in Equatio

Last Modified on Thursday, 02-Jul-2026 09:14:06 BST

When creating math expressions or equations using **Equatio,** you can increase the size of your insertions by going into the Equatio menu located on the left hand side of the toolbar, selecting **Options** and then selecting the **Math Options** tab shown below.

This will pull up the **Math font size** option, allowing you to adjust the size of your insertions to your liking!
