

Installing Additional Voices

Last Modified on Monday, 23-Mar-2026 14:35:46 GMT

We have a number of additional voices that you can download and install for Read&Write for Windows. To do this please visit your account my.texthelp.com and choose My Voices on the left panel.

1. Download and install the voice you want to add to Read&Write.
2. When the voice has been installed, open Read&Write.
3. Click on the **Settings** button, then **Show more settings...**

If you're using the Read&Write for Work toolbar, click on the Settings button and then Settings.

4. In Read&Write settings, go to **Speech** and select the voice you installed from the **Voice** drop down list.

Read&Write will now use the new voice you installed.
