

How To Allow Camera Access For Equatio Mobile (iPhone)

Last Modified on Thursday, 28-Apr-2022 16:35:49 BST

Equatio mobile for iPhone will require permission from your camera in order to take math images for editing and uploading from your mobile device.

Without granting access you will be brought to an error screen saying permissions need to be turned on:

We could not get permission to access your camera.
This is needed to take pictures!

This can be turned on in a few simple steps:

iPhone:

1. Launch **Settings** from your home screen
2. Tap **Safari**. You may need to scroll down to find it.
3. Tap the switch next to **Camera & Microphone Access** located under **Privacy & Security**.
