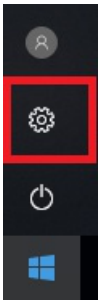
Installing The Arabic Microsoft Naayf Voice

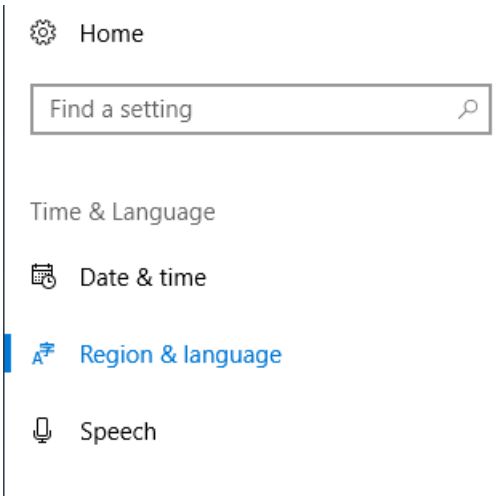
Last Modified on Monday, 05-Oct-2020 16:46:06 BST

1. Select the Windows start button and select Settings.

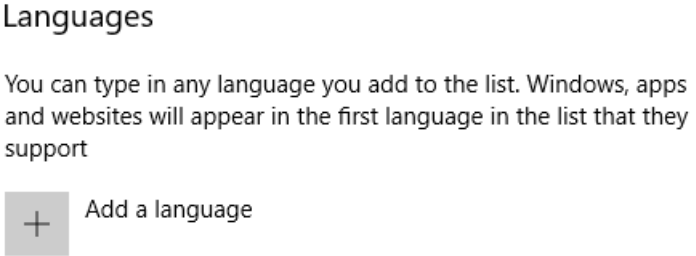


2. Choose **Time and Language**

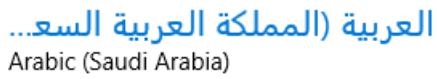
3. Select **Region and Language**



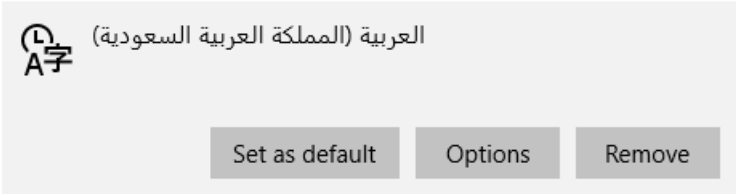
4. Select **Add a language** then choose **Arabic**



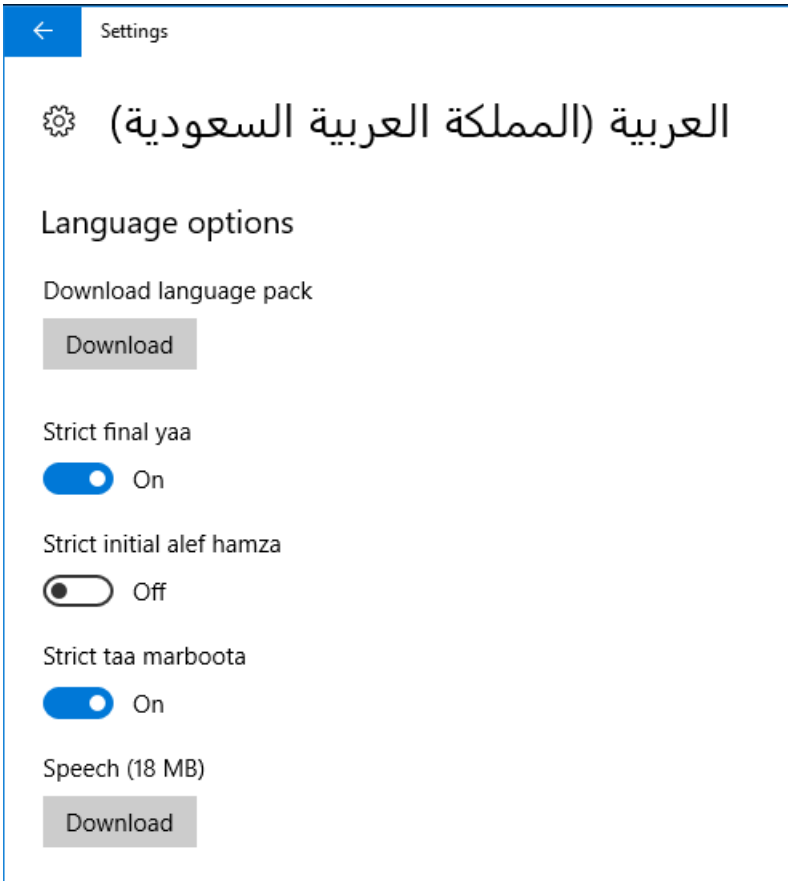
5. Choose the **Arabic (Saudi Arabia)** language and install. When installation has finished you will return to the **Region and Language** page.



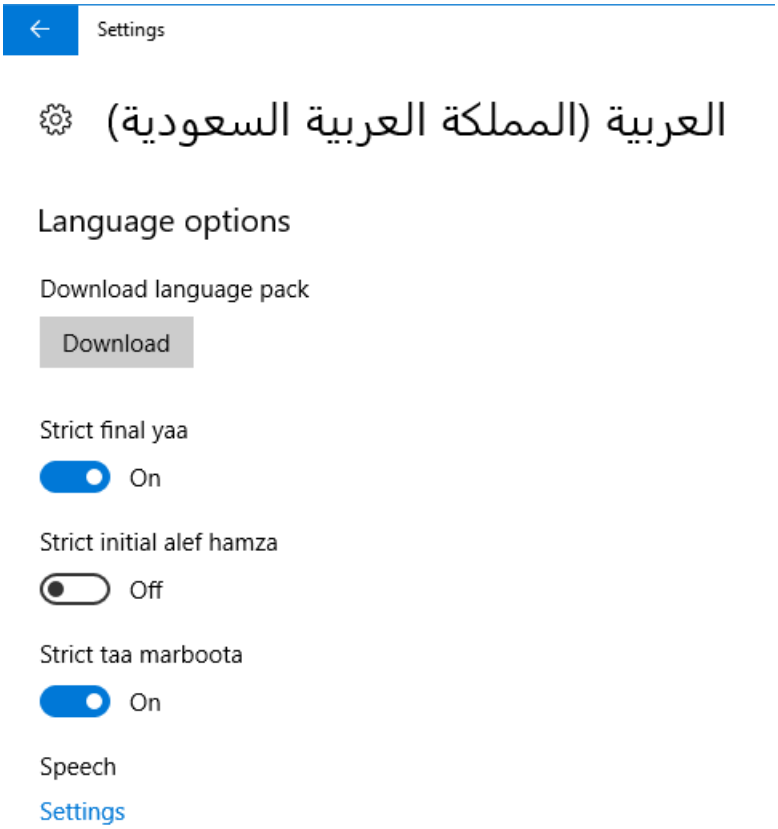
6. Select the Arabic (Saudi Arabia) language and choose **Options**



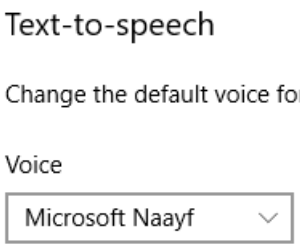
7. Under **Download Language pack**, select **Download** then under Speech select **Download**



8. When downloads are completed under **Speech** the download button will be replaced with a **Settings** link



9. To confirm that **Microsoft Naayf** has been successfully installed, under **Speech** select Settings then under **Text-To-Speech**, Microsoft Naayf should be in the list of voices.



10. That is it, you can now select the Microsoft Naayf for use in Read&Write
