Importing Voice Profiles

Last Modified on Thursday, 03-Aug-2023 19:26:21 BST

The purpose of this article is to show how to import voice profiles for Windows Speech Recognition that can be used with Read&Write for Windows.

- 1. Download the Speech Profile Manager
- 2. Double click on the appropriate platform to begin your download.
- 3. Run this file.

4. Click Yes

5. Select the location where you would like to store these files and click Unzip

6. Go to specified location and run SpProfileMgr

SpProfileMgr	05/04/2004 16:21	Application	164 KB

7. The window below will now be displayed.

- 8. Select the profile you want to transfer and click on the Export button.
- 9. Specify what location you want the file stored in and save the file as the name of the user. (This will make it easier to decipher between different voice profiles)
- 10. Save this file in a transferable location I.e. Google Drive, USB etc

On New Machine

1. Repeat the same process as before

Go to Microsoft Download Center

2. Click Download

Run this file.

3. Click Yes

WinZip Self-Extractor [SPPROF~2.EXE]	×
To unzip all files in SPPROF~2.EXE to the specified folder press the Unzip button.	Unzip
Unzip To Folder:	Run WinZip
C:\Users\J3226~1.RUS\AppData\Local\Temp	Close
