## Admin Installation Of Equatio For Schoology

Last Modified on Thursday, 28-Apr-2022 19:19:09 BST

Schoology recommends setting up your tool providers at the district level. District-level installation of an LTI tool is the most effective way to distribute LTI content across a school, district, college, or university. This method also ensures that you have full control over the integration and its launch credentials.

Follow these steps to set up Equatio for LMS in Schoology at the institution-level:

| Recent Activity  | Integration  |  |
|--|--|--|
| Calendar   | Remote Auth Custom Domain Claim Domain API External Tool                       | External Tools (LTI) / Add   |
| People     Subscriptions 28     Edit Users     System Settings | Add External Tool Provider Tool Name:  | External Toole (LTI) can be adde<br>courses for access to other web-<br>Use this area to add External To<br>It easier to manage credentals ill<br>Secrets, and other settings. |
| Grade Settings<br>Privacy Overrides<br>Word Filter             | Consumer Key: Shared Secret: Privacy: Send Name and Email/Username of user who | What is LTI?<br>Learning Tools Interoperability (<br>standard that allows access to w<br>from a growing number of LTI or<br>o la •<br>Schoology's LTI integration allow        |
| Integration<br>Schools<br>Support Contacts                     | Configuration Type: Manual  Match By: Domain  Domain/URL:  Custom Parameters:  | resources to be accessed through<br>viewed directly on the platform.   |
| Export     Advisees  | One key value pair per line (e.g. key-value)                                   |  |

- 1. Click System Settings on the left menu of your System Admin home page
- 2. Click Integration (directly below System Settings) in the left navigation menu.
- 3. Select External Tools tab at the top of the page
- 4. Click Add External Tool Provider.
- 5. Fill out the necessary information in the pop-up window as shown:

| Custom Domain C                              | laim Domain API External Tools                |        |  |  |  |  |

| One key value pair per line (e.g. key=value) |   |        |  |  |  |  |
|  |   |        |  |  |  |  |
| Submit Cancel                                |   |        |  |  |  |  |

Consumer Key: This will be your Product Code found in your purchase email

Shared Secret: Found in your purchase email

Privacy: Only send Email/Username of user who launches the tool

Configuration Type: Manual

Match By: Domain

Domain/URL: https://equatio-lti.texthelp.com

Customer Parameters: domain=yourdomain.com (replace with your own domain)

Next, we will add the **Equatio LTI App** from the **Schoology App Center** 

Select "Categories" -> "Mathematics" and you will see Equatio appear

Click "Install LTI App" then you will be brought to the terms and conditions. Once you've read through, select "I Agree". When prompted where to install, select "Add to Organization".
