

Enabling The LTI Content Item Messaging Variable In Brightspace

Last Modified on Thursday, 28-Apr-2022 19:17:45 BST

The Equatio LTI for Brightspace D2L requires the Content Item Messaging variable to be enabled.

To enable the content item messaging variable follow the steps below:

1. As a Brightspace admin, navigate to the Account and select the Settings icon from the top right corner.
2. Select **Config Variable Browser** as shown in the below figure.

3. From the Config Variable Browser list of variables on the left, select **Tools**.
4. From the Tools list, select **Lti**.
5. From the Lti list, select **ContentItemMessaging**.
6. Under ContentItemMessaging select **IsEnabled**.

Config Variable Browser

All Variables d2l > Tools > Lti > ContentItemMessaging

d2l.Tools.Lti.ContentItemMessaging [View Change History](#)

Search Content... 🔍

Type	Name
⚙️	IsEnabled ←
⚙️	RejectUnsigned

7. If the value shown is Off, click the pencil icon and change it to On.
