How Can I Uninstall the Equatio Google Chrome Extension?

Last Modified on Thursday, 02-Jul-2026 09:05:51 BST

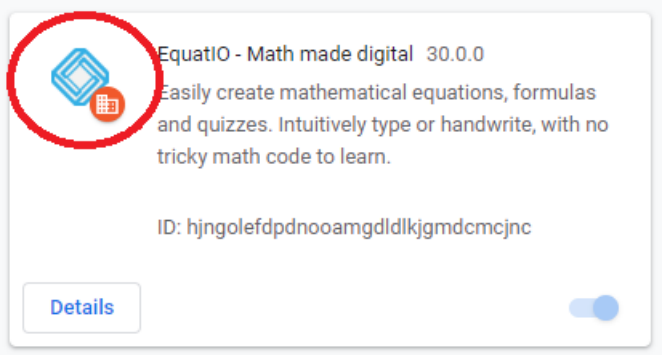

To uninstall the **Equatio** extension, do the following:

1. Type chrome://extensions in the Chrome address bar
2. Find Equatio in your list of extensions
3. Click Remove
4. Click Remove when prompted to verify you want to remove the extension

If the Remove button does not appear

If you're not able to remove Equatio because the remove button does not appear, you will need your Administrator to remove the installation. The red building icon shown on the icon indicates the extension has been force installed by your Administrator.

Please contact your organization's Google administrator for further information.
