

Deploying Read&Write For Microsoft Edge Using Group Policy

Last Modified on Tuesday, 29-Sep-2020 16:15:28 BST

Please follow the instructions below:

1. **Download** and install the [Edge Administrative Templates](#):
2. Open **Group Policy Management**
3. Create a new GPO for the policy (or add to an existing policy)
4. Right-click your GPO, and select **Edit**
5. You will then see the **Group policy management Editor** window
6. Expand the Computer/User configuration tree on the left-hand side, depending on how you wish to configure your policy
7. Right-click on **Administrative templates** and select **Add/Remove Templates**
8. Click on **Add**
9. Browse to the templates you downloaded in step 2 and open the **msedge.adm** template that is relevant to your operating system and Language.
10. Once uploaded, expand to the following path (may vary depending on your OS) on the left of the Group policy management editor:

Computer/User configuration > Policies > Administrative templates > Classic administrative templates > Microsoft Edge > Extensions >
11. On the right-hand side, select **Configure the list of force-installed extensions**
12. Right-click, and select **Edit**
13. Mark the **Enabled** button
14. Click the **Show...** button
15. Under the **Value** column, enter the following:

<https://edge.microsoft.com/extensionwebstorebase/v1/crx>
16. Click **OK**, followed by **Apply**
17. Back in the **Group Policy Management** window, assign this policy to users/computers as normal
18. Users affected by this GPO should now see the Edge extensions installed and enabled automatically (once the GPO has updated on their machine).
