

Check It, Prediction or Screenshot Reader Not Working

Last Modified on Thursday, 29-Jan-2026 17:35:09 GMT

If Check it, Prediction and/or Screenshot Reader are not working properly, please make sure these security settings are turned on:

1. In System Settings on your Mac, go to Privacy & Security and click on **Automation**. Under **Read&Write** ensure **Microsoft Word** is switched on.
 2. In System Settings > Privacy & Security > **Accessibility**, make sure **Read&Write** is switched on.
 3. In System Settings > Privacy & Security > **Screen & System Audio Recording**, make sure **Read&Write** is switched on. If Read&Write is not in that list, try to run Screenshot Reader and it will appear there.
