

# Check It and Screenshot Reader Not Working

Last Modified on Wednesday, 15-Dec-2021 11:12:07 GMT

Please make sure these security settings are turned on:

1. In System Preferences on your Mac, go to Security & Privacy and click on Privacy. Find **Automation** in the list on the left of the window and under **Read&Write** ensure there is a tick for **Microsoft Word**.
  2. Also in System Preferences > Security & Privacy, under Accessibility, make sure that there is a tick beside **Read&Write**.
  3. In System Preference > Security & Privacy > **Screen Recording**, make sure there is a tick beside **Read&Write**.
