Mac Voices

Last Modified on Thursday, 01-Feb-2024 15:48:58 GMT

As part of your ClaroRead software, you have access to loads of different voices to choose from.

To get started, open ClaroRead on your Mac and then on your menu bar, click on ClaroRead to show the following menu:

(Please be aware, if your licence was obtained before February 1st 2024, you will not have access to the **Manage online voices** section)

Manage online voices

	Online Voices		
Check the voices you want to see in the main voice list:			
	Arabic Zeina		
	Chinese (China) Zhiyu		
	Danish Mads		
	Danish Naja		
	Dutch (Netherlands) Lotte		
	Dutch (Netherlands) Ruben		
	English (Australia) Nicole		
	English (Australia) Olivia		
	English (Australia) Russell		
	English (India) Aditi		
	English (India) Raveena		
	English (New Zealand) Aria		
	English (South Africa) Ayanda		
	English (United Kingdom) Amy		
	English (United Kingdom) Brian		
	English (United Kingdom) Emma		
	Close		

From the Online Voices menu, you can select which voices you would like to have appear in your ClaroRead voice list.

These do not require a download as these are all streamed.

This means that if you have no internet connection, these voices will not work.

If these voices do not work and you have Firewall restrictions in place, you will need to add our URLs to the

Manage Apple voices

•••		
English Da	niel English (UK) - Daniel	
Arabic	Daniel	í
Bangla	Daniel (Enhanced)	С Ф
Basque	155.4 MB	
8 Bhojpuri	English (UK) - Eloquence	
Bulgarian Catalan	Eddy	(ì)
Chinese		
Chinese Croatian	Flo	í
	🕑 Grandma	i
Danish	()) Grandpa	(i)

Malay		

This will take you to the System voices and allow you to download the enhanced voices (be aware, that the enhanced version may be called Premium)

If you want to use a system voice, you will need the enhanced version to use it with ClaroRead.

Manage Claro Voices

If you want to delete a voice, you can click on the voice and then use the - button in the bottom left, this will remove the voice from your Mac.

You can add a new voice by using the + symbol in the bottom corner to access the full list of available ClaroRead voices.

Then you can select the voices you would like to download by using the boxes on the left, and then clicking Download in the bottom left (this button will illuminate once you have selected a voice)

Selecting a ClaroRead voice

Once you have chosen your voice from the $\ensuremath{\mathbf{Manage}}$ section, you can now open

ClaroRead>Settings>Speech.

In the speech menu, you can click on the arrows in the **Voice** section, this will show you the voices you have available to use.
