

# Installing Claro Chrome Apps And Extensions

Last Modified on Tuesday, 25-Jun-2024 10:37:39 BST

How to install ClaroRead Chrome on your Chromebooks and Google Domain, for end users and site licences, and how to upgrade to Premium.

ClaroRead Chrome is available in the [Chrome Web Store](#). You always install it from there, whether you are an end user or a system administrator with lots of machines.

For end users with Google Chrome or a Chromebook, you can simply install the free Chrome extension into your machine. Then you need to unlock its premium features by entering your ClaroRead licence key into the Settings window.

- [ClaroRead Chrome Extension](#) in the Chrome Web Store.

For system administrators in schools, colleges, companies or organisations, it is more complicated. You may want to push one of our Apps or Extensions to every end user. If you have not already done so, you need to sign up to Chrome for Work and Education for your organization. You can then find User settings and App management in the Admin console and assign extensions as required.

- [Manage Chrome Apps by organizational unit](#)

See Provisioning ClaroRead Chrome for how to set up licensing so all the premium features are unlocked.
