

# Provisioning Chromebook Site Licences

Last Modified on Tuesday, 25-Jun-2024 11:16:09 BST

*How to get ClaroRead Chrome or ClaroRead Edge to every user in your organisation.*

- *Looking for Windows or Mac software? [Getting your Windows or Mac Site Licence Software](#)*

If you have purchased a ClaroRead Chrome site licence then you will want to push it out to your organisation's Chromebooks.

First, you should follow the step-by-step instructions on [Provisioning ClaroRead Chrome, iOS Apps and Web Apps](#). This gets everything ready for when you push the software out to your Chromebooks.

Next, **you can push ClaroRead Chrome out for installation across your whole Google Domain by installing ClaroRead Chrome from the Chrome Web Store** to your target Chromebooks using the **Google Admin Console**:

- [Automatically install apps and extensions \(Google\)](#)

Here is the ClaroRead Chrome extension Store entry for you:

- [ClaroRead Chrome in the Google Chrome Web Store](#).

That's it! All the users in your Google Domain now get the features of ClaroRead Chrome Premium – scan from screen and reading in Word Online. You also have some administration tools appear which you can use to customise your ClaroRead Chrome installations – see [ClaroRead Chrome Extension Site Policies](#).
