Uninstalling all Claro Products

Last Modified on Wednesday, 28-Jan-2026 11:02:56 GMT

The following VBScript, run from a command line with administrator privileges, will remove all Claro Software products on the machine.

Run with cscript, e.g. cscript removeallproducts.vbs

```
Set fso = CreateObject("Scripting.FileSystemObject")

Set installer = CreateObject("WindowsInstaller.Installer")

Set objShell = WScript.CreateObject("WScript.Shell")

On Error Resume Next ' we ignore all errors

For Each product In installer.ProductsEx("", "", 7)

  productcode = product.ProductCode

  name = product.InstallProperty("ProductName")

  version=product.InstallProperty("VersionString")

  manufacturer=product.InstallProperty("Publisher")

  if instr(1, manufacturer, "Claro Software") > 0 then

   call objShell.Run("msiexec /X " & productcode & " /passive", 1, True)

  end if

Next
```
