

Support For Read&Write Desktop Chrome Extension Permissions Change

Last Modified on Thursday, 29-Jan-2026 17:28:49 GMT

What's new

- A new updated version of the "Support for Read&Write Desktop" Chrome extension has been released.
- This update enables Read&Write to work with Chrome using Google's newest security and performance standards for Chrome extensions (Manifest V3), and provides more support in more places.

What you need to do

- To comply with Google's new standards, new permissions are required by the Support for Read&Write desktop extension.
 - You will have to accept these new permissions in order to re-enable the extension.
 - To re-enable the extension simple follow the steps below:
 1. Click on the yellow attention icon to show the new permissions window.
 2. Click on the Re-enable button to agree to the new permissions.
 3. Refresh any open web pages you want to use Read&Write with.
-
