

Microsoft Two Factor Authentication

Last Modified on Monday, 19-Dec-2022 16:51:32 GMT

Microsoft have started to enforce two factor authentication on Azure AD logins. Due to this you may see an additional dialog pop up when signing in to our Products using the Sign in with Microsoft option.

If this additional dialog does appear, once you have completed setting up 2 factor authentication on your Microsoft account, you will be able to sign into Read&Write successfully.
