Deprecation of Equatio Server Email

On 1st July we will be making a change on our system in relation to how our users login to Equatio.

Old versions of Equatio Desktop use our old "equatio-auth.texthelp.com" login which is what we will be shutting down.

Users will need to be running Equatio for Desktop (Windows or Mac) Version 1.8.0 or higher to sign in and use the Equatio Desktop product after June 30th.

We will be taking down the server as of July 1st.

If you need to check which version you are currently running on, see the demonstration below:
