Please download the latest installer from https://www.texthelp.com/en-gb/solutions/dsa/autocorrect-downloads/

Once downloaded, open the downloaded installer and follow the on screen instructions to update your Global AutoCorrect to the latest version.

Once you have installed the latest version, you can then uninstall the previous version from your machine. When uninstalling, please make sure you are uninstalling v4.3.

Alternatively, you can do this before you install the latest version.
