I Get a "Popups disabled" Warning when Signing into OrbitNote

Last Modified on Tuesday, 30-Jun-2026 08:39:01 BST

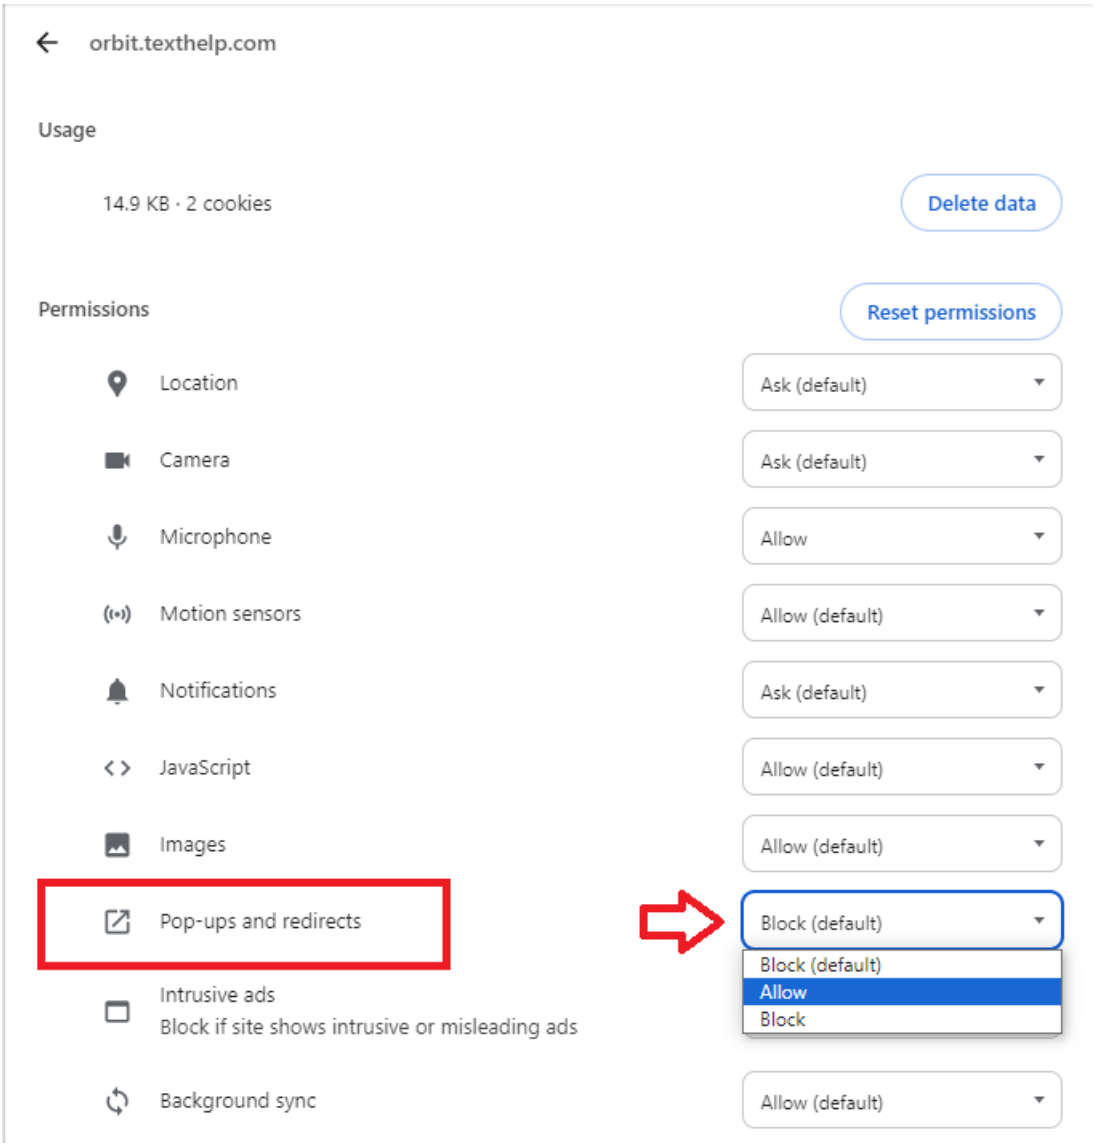

If you see this screen when navigating to orbit.texthelp.com :

Then you will need to allow pop-ups before being able to sign into OrbitNote

Click on the icon to the left of your address bar, then toggle the Pop-ups and redirects option to Allowed, and refresh the page. If the "Pop-ups and redirects" option does not appear on this dropdown menu, then select the "Site settings" option

On the menu that opens, scroll down to "Permissions" and locate "Pop-ups and redirects" then change from "Block" to "Allow"

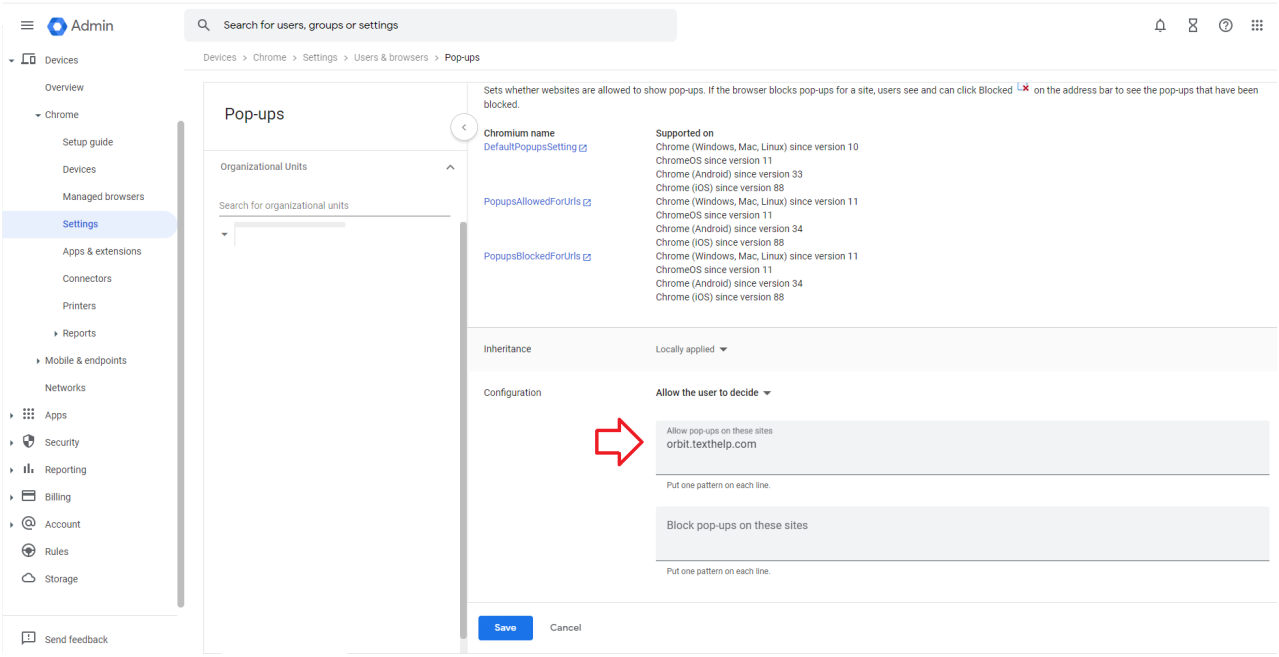

And you should then be able to refresh orbit.texthelp.com and see the sign in screen:

A Google Admin can also push a policy to allow pop-ups for specific sites across all users:

This setting can be found in the Google Admin Console under: Devices -> Chrome -> Settings -> Users&Browsers -> Pop-ups

Then configure to allow pop-ups for: orbit.texthelp.com

You can find more information on allowing or blocking pop-ups in Chrome from Google's support article here:
