

Global AutoCorrect Mac Command Line Installation

Last Modified on Friday, 26-Jan-2024 16:09:25 GMT

To install via commandline:

```
sudo installer -pkg "path/to/GlobalAutoCorrect.pkg" -target /
```

To set the license key, for each user:

```
defaults write com.lexable.globalautocorrect.uservalues.plist Serial -string "license-key" e.g. defaults write com.lexable.globalautocorrect.uservalues.plist Serial -string "12345-12345-12345-12345-12345"
```

MDM .mobileconfig profile - Allows GAC access to the keyboard to allow corrections. Example here:
