

Read&Write AutoCorrect Command Line Installation

Last Modified on Wednesday, 19-Jul-2023 14:15:34 BST

To install via commandline:

```
sudo installer -verbose -pkg "path/to/Read&WriteAutoCorrect.pkg" -target /
```

To install license key, for each user: [will be covered by however Read&Write does licensing]

MDM .mobileconfig - Allows RWAC access to the keyboard to allow corrections. Example profile here:
