

How to Configure OrbitNote as a Trusted Third Party App in the Google Admin Console

Last Modified on Friday, 15-Mar-2024 19:08:23 GMT

Sign in with your Admin account at admin.google.com

Navigate on the left sidebar to Security -> Access and data control -> API Controls

Then click on "Manage Third Party-App Access"

The screenshot displays the Google Admin Console interface. On the left, the navigation sidebar is visible, with 'API controls' selected under the 'Access and data control' category. The main content area is titled 'API controls' and includes a search bar at the top. Below the title, there is a brief explanation of API controls. The 'App access control' section provides an overview of app access, including statistics on restricted and unrestricted Google services, and pending, configured, and accessed apps. A red arrow points to the 'MANAGE THIRD-PARTY APP ACCESS' button. The 'Settings' section at the bottom includes options for 'Custom user message', 'Unconfigured third-party apps', and 'Internal apps'.

Click on "Add app" -> "OAuth App Name or Client ID"

Admin

Search for users, groups or settings

Security > API Controls > App Access Control

Google services
Select access settings for Google service APIs to control what kind of third-party apps can request access to these services. [Learn more](#)
[View list](#)

Apps pending review
Review and configure access for apps requested by users designated as pending review. [Learn about apps pending review](#)
