MacOS 15 Sequoia - Security Warning

When using ClaroRead with MacOS 15 Sequoia, you may be prompted with the following security warning:
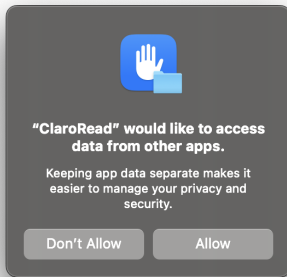

You will be able to click "Allow" and this will launch ClaroRead as normal.

You can also permanently allow ClaroRead "Full Disk Access", which will stop this message appearing whenever you open ClaroRead.
You can do this by opening Apple Menu>System Settings>Privacy & Security>Full Disk Access and then toggling the switch next to ClaroRead.
