Command line usage (pre install) MSI deployment

Last Modified on Wednesday, 09-Oct-2024 15:27:15 BST

Deploy the License file and/or the ExamWritePadSettings.json file and/or the logo file during the MSI install as a command line properties below.

Parameters:

- LICENSEKEYFILE= *(Followed by the full path and file name of the License file)*
- SETTINGSFILE= *(Followed by the full path and file name of the Settings JSON file)*
- LOGOFILE= *(Followed by the full path and file name of the logo file you wish to use on the start-up splash screen)*

For example:

```
ExamWritePad.msi LICENSEKEYFILE="\ServernameSharelicense.lic" SETTINGSFILE="\ServernameShareExamWritePad
Settings.json" /qn
```
