Add Zotero library to Sources

To add your Zotero library to Writing Helper sources, first you will need to export your Zotero library to a "Zotero RDF" folder.

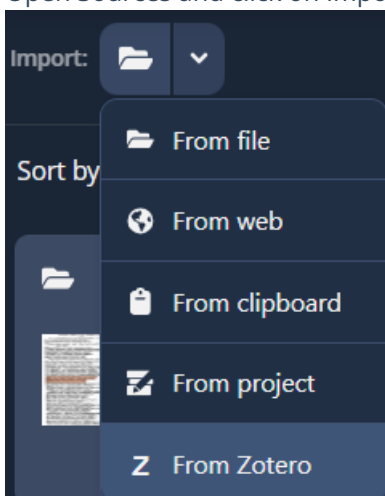

To do this, open Zotero and right click **My Library** (on Mac, this may be disabled and you will need to hold CTRL on the keyboard as you click)

Then, on the pop out menu, click on **Export Library...**

Once the library has exported, you can go back to Writing Helper.

Open Sources and click on Import>Zotero.

Then find the exported Zotero folder and you can add this to Writing Helper.
