

A New Way to Listen in uPar

Last Modified on Monday, 12-May-2025 15:16:23 BST

A New Way to Listen to uPar:

We're excited to introduce AI voices in uPar—bringing students a clearer, more personalized way to hear and engage with text.

With 6 new voices—including 2 expressive AI options and 4 traditional TTS voices—students now have more choice in how they listen during assessments. Whether it's a steady, neutral TTS voice or a more natural-sounding AI voice, this update helps reduce cognitive load, support focus, and better reflect students' true comprehension.
