

# How do I share my mind map?

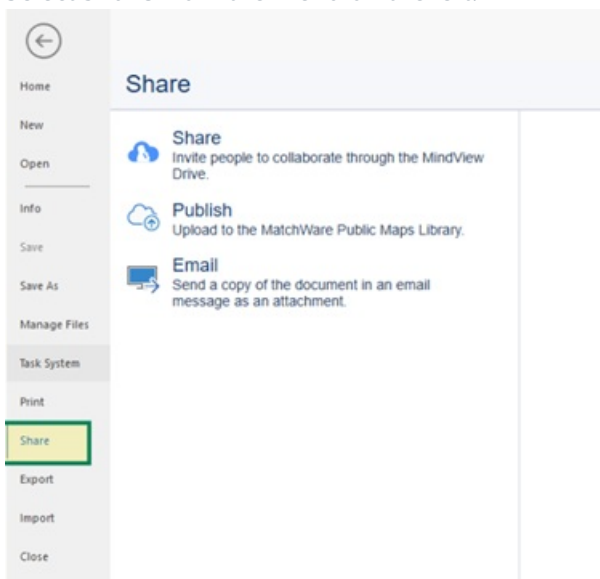

Last Modified on Monday, 08-Dec-2025 14:03:01 GMT

Getting your mind map into the hands of your team or collaborators is **fast and easy**. Here are the three powerful ways to share and impress:

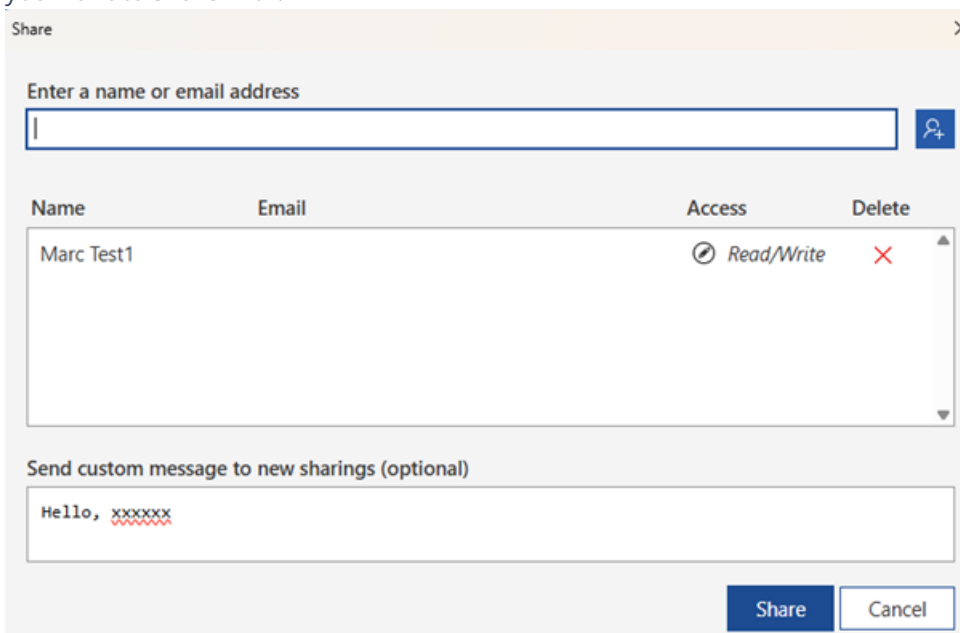

## 1. Share Securely with a Direct Link

This is the **smooth, secure** path to collaborate! It saves your mind map to your secure MindView Drive and sends a direct, private access link.

- Click the **File tab** in the top left.
- Select **Share** from the menu on the left.

- In the **Share** field, just type the names (if they use MindView) or the email addresses of the people you want to share with.

- Hit **Share** to send the invitations!

**The Boost:** Users get an email with a private link. This is the **key to saving you time** and ensuring only your intended collaborators can access the file. Even if they don't have an account yet, the email will give them everything they need to get started!

## 2. Publish to the Public Library

Want the world to see your creation? The Publish option is perfect for sharing widely!

- Click the **Publish** option in the sharing menu.
- This instantly uploads your mind map to MindView's public online library and generates a **public link** you can share anywhere on social media, in a presentation, or via chat.

**Important Note:** This library is open to everyone! All visitors can see, download, and use your published documents. Think of it as a showcase for your incredible ideas!

## 3. Quick Share via Email

For a fast, traditional approach, just email the file directly.

- Select the **Email** option.
  - This will automatically open your computer's email program and attach the mind map file to a new message.
  - Fill in your recipients and hit send!
-
