

Restoring the default interface

Last Modified on Monday, 08-Dec-2025 14:07:18 GMT

Resetting your MindView interface to its default settings is a **super-easy process** that will get you running with the factory setup again.

Here is the exact step-by-step guide to implement the change:

1. **Launch MindView** and click the **File tab**.
2. Select **Options** from the menu on the left.
3. Choose **Preferences** from the list.
4. Scroll down until you see the **Reset Interface** setting.
5. Change the value to **"Yes."**
6. Validate this powerful change by clicking **OK**.
7. **Restart MindView.**

That's it! You will immediately see the clean, default interface waiting for you.
