

Why do I have to sign in every time I open MindView Mac?

Last Modified on Friday, 12-Dec-2025 13:58:22 GMT

The reason you're currently signing in so often is usually tied to the initial setup options when you first ran MindView. We can fix that with one quick adjustment that will **unlock** the continuous sign-in feature.

Here is the exact step to implement this great change:

1. **Click** the **MindView** tab (it's at the top-left of your screen).
2. **Select** "Preferences."
3. **Go to** the "License" section.
4. **Uncheck** the box next to 'Don't show "Stay logged in?" dialog.'

Exit and **restart** MindView Mac.

- You will now see the option: **“Stay logged in?”**
- **Select Yes** and **tick the check box** to ensure this powerful setting is active every time you launch!

That's the key to getting you running faster! This simple adjustment gives you the **huge boost** of seamless access whenever you open MindView.
