

How do I change the Display Language in MindView?

Last Modified on Friday, 12-Dec-2025 15:43:35 GMT

MindView is **fantastic** because it supports several major languages right out of the box, including English, French, German, Danish, and Norwegian. While you can always pick your default during the initial setup, it's super easy to change it later.

Here is the quick fix to **implement this exciting change** right now:

Switching Your Display Language

- **1. Launch MindView:** Open the application.
- **2. Click 'File':** This is located in the top-left corner.
- **3. Select 'Options':** You'll find this at the bottom of the column on the left.
- **4. Go to 'Preferences':** Look for the 'Display Language' setting here.
- **5. Select Your Language:** Choose your desired language from the list and hit 'OK'.

That's the key! To see the result and **unlock** the new language throughout the application, simply restart MindView one final time.
