

The Picture Dictionary In Read&Write for Windows Doesn't Show Pictures

Last Modified on Monday, 15-Dec-2025 15:25:22 GMT

We have recently updated the service that powers the **Picture Dictionary** feature in Read&Write for Windows.

As a result of this update, you may currently find that the Picture Dictionary **is not returning any images** when you look up a word.

The good news is that resolving this is simple! You just need to install the latest version of Read&Write.

To ensure your Picture Dictionary works perfectly, please **update your Read&Write for Windows software to the latest version: 12.0.90**.

This new version has the necessary fixes to connect with our updated service.
