How do I customise my keyboard shortcuts in MindView?

Last Modified on Tuesday, 16-Dec-2025 14:59:33 GMT

Getting your workspace set up exactly how you like it is a fantastic way to boost your productivity! Creating your own keyboard shortcuts is a powerful move that will make navigating MindView feel like second nature.

Here is how to create your custom setup:

1. **Open the Shortcut Menu:** Right-click anywhere on the **Ribbon** (the menu bar at the top of your screen) and select **Customize Quick Access Toolbar**.

2. **Access the Customizer:** In the window that pops up, look for **Keyboard Shortcuts** at the bottom and click the **Customize** button.

3. **Map Your Shortcuts:** Simply choose the command you want to speed up, type in your preferred key combination, and you're all set!

You've just streamlined your entire workflow!
Having these personalized shortcuts at your fingertips will make your design process **faster, smoother, and much more intuitive.**
