

I typed a task and it disappeared! Where did it go?

Last Modified on Friday, 09-Jan-2026 10:19:47 GMT

There are two common reasons a task might seem to vanish:

- It wasn't **Committed**: In Tasks, you must press Enter after typing to save a task, or edits to the task. If you navigate away before hitting Enter, the task won't save.
 - It was **Deferred**: If you accidentally clicked Defer, the task is hidden until a future date. Check the Deferred view in the sidebar to see if your task is waiting there to resurface later.
-
