

Why isn't the Floating Timer or Ambient Sound working?

Last Modified on Friday, 09-Jan-2026 10:21:03 GMT

These focus tools rely on specific browser features:

- Floating Timer: This uses **Picture-in-Picture** technology. If the button doesn't work, ensure you are using a modern version of Chrome or Edge.
 - Ambient Sounds: Some browsers block audio from playing automatically. If you don't hear anything, click anywhere on the page to **wake up** the audio, or check that your browser tab isn't muted.
 - Permissions: Ensure you have granted the site permission to send Notifications in your browser settings so you can hear the timer alerts.
