

System Requirements

Last Modified on Friday, 10-Apr-2026 16:19:22 BST

To ensure MindView runs smoothly on your device, please verify that your system meets the following specifications and has the necessary software modules installed.

Operating System & Hardware

Operating System: Windows® 10 or higher.

Disk Space: 1.7 GB of available hard disk space.

Dependent Modules

The following frameworks are required for MindView to function. Most modern Windows installations already include these, but you can download them manually if prompted:

Microsoft .NET Framework: Version 4.8 or newer.

Microsoft .NET 8: Download from Microsoft.

Microsoft Visual C++ 2022 Redistributable: (Version 14.4x or newer).

- o Download x64 (Standard Windows)
- o Download ARM64 (Windows ARM devices with emulator)

Additional Required Components

Microsoft Edge WebView2 Runtime: MindView utilizes the WebView2 Runtime browser to render specific interface elements.

o Installation: The MindView installer will automatically check for this and install it if it is missing.

o Manual Download: If you need to deploy it manually, you can find it here: [Microsoft Edge WebView2 Runtime](#).
