

uPar System Requirements

Last Modified on Friday, 25-Sep-2026 15:32:03 BST

uPar System Requirements:

[Universalpar.com](#) and [Startpar.com](#) are web applications that update continuously, so you will always use the latest version. We aim to support the widest range of browsers possible; however, we officially support only the following browsers.

We officially support Chrome, Edge and Safari.

We support each browser version for 18 months after release. If your browser is older than 18 months, we recommend updating it before using UniversalPar.

The application may work on other browsers, but we cannot guarantee it.
